

Name: Elif ŞAHİNGÖZ
Student ID: 17050111056
Date: 29.12.2018

Fall 2018-2019
AYBU Computer Engineering Department
CENG101 – Introduction to Comp. Eng.
Instructor: M. Abdullah Bulbul

Seminar Report

Presenter: Abdullah BÜLBÜL
Company: Ankara Yıldırım Beyazıt University
Presentation date: 21.12.2018

Short summary of the talk:

First, the presenter talked about his educational life, the schools he received education at. Second, he mentioned about the areas where he worked such as 3D phone project, perceptual computer project, vision science and city modelling. Finally, he referred about things that make a difference.

What have you learned?

I have an idea about computer graphics and 3D modelling. Also I learned that some photos shared on social media are used for city modelling. In addition, I learned that nothing is useless in the first attempt, we need to work fast or slow, so patience is very important in this area.

Which parts of the presentation were particularly important/useful?

I think the most important part is the speaker's advice on what we should do in engineering, because access to technical information is easier than listening to the advice of an experienced person.

Comment on the talk, the presenter, the company, and their projects.

There was a speech that could benefit my career with answered questions and shown documents.
