Seminar Report

Presenter: Ahmet Can ÇAVLAN/Muhsin ÖZBEK
Company: TÜBİTAK
Presentation date: 12.10.2018

Short summary of the talk:
First presenter said that the effect of lectures on the sector. Also, he told that interviews, his own experiences and sectors where he works(software technologies research institute).
Second presenter talked about a metaphor about engineering and where he works.

What have you learned?
Firstly, the information learned in the courses help us in the sector but this is not enough. After we graduate, we will continue to learn through our works. Secondly,self study and practice are very important especially in the work so only school is not enough.And our own effort is more important than our university.Finally,TÜBİTAK has a lot of work areas.

Which parts of the presentation were particularly important/useful?
I think that most important part is about interviews. Because this part was about the realities of business life.After that presentation, i have been some ideas about this issues. In addition, It was important in conversations about getting work experience while studying at school.

Comment on the talk, the presenter, the company, and their projects.
In my opinion,the presenters made a speech that would benefit us about business or school life. Also, it was fun listening to business memories.
